

Peet's Coffee & Tea

POWDERED MILK AND COCOA

Peet's Coffee & Tea's attention to superior product and detail continues with our introduction of the finest quality powdered dutch cocoa and powdered milk for single cup systems.

Peet's is proud to introduce our premium dutch cocoa and powdered milk. Both reflect the flavor profiles found in Peet's stores, and will produce a world class latte, cappuccino, mocha and hot cocoa in your single cup system.

PEET'S DUTCH COCOA POWDER

With intense research, our beverage development team has produced a fine powdered cocoa, rich in chocolate and complex flavors. Dutch cocoa is European in origin, and it is the finest cocoa you can buy. A more involved process allows dutch cocoa to show more complex, desired flavors. Peet's Powdered Cocoa is available to you in 2 pound bags.

PEET'S ALL NATURAL POWDERED MILK

Our powdered milk is produced specifically to keep the flavor profile as close to fresh milk as possible, avoiding burnt flavors that show in typical manufacture. The result is creamy texture and rich and naturally sweet flavor. Special handling and extra labor intensive methods keep flavors true. We've specifically tested our product side by side with fresh milk made into lattes and cappuccinos, and the result is nearly an indistinguishable difference. Our powdered milk is 100% milk, and is available to you in 1 pound bags.
